DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to because the view numbers are not in accordance with 37 CFR 1.84(u)(1). For example, "FIG. 2A" should replace "FIG. 2a", "FIG. 2B" should replace "FIG 2b", etc. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 15, 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In these claims, the meaning and scope of what is meant by “at least part of the right” to duplicate content is unclear.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 20 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Note MPEP 2106.

To correct this claim in accordance with MPEP 2106:

- (A) in line 1, between “program” and “for”, insert “tangibly embodied in a computer-readable medium”, and

(B) in line 5, replace “comprising” with “, when run, causes the networked apparatus to perform the following steps”.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1, 2, 4-7, 16, 19 and 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Alve et al., U.S. 2003/0076955 A1.

Alve et al. describe a networked content distribution system (note Figure 1), just as in the claims, including judging which devices are in or out of a given group or groups (note Figure 1, elements 10, 30, 40 and Figures 2A and 2B) and flexibly and dynamically setting a predetermined number of authorized duplications for a device or group. Note, for example, paragraph [0045].

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alve et al., US 2003/0076955 A1.

The features of claim 14, including a clock and a stored predetermined date-and-time, and control for updating the predetermined number when the clock reaches the stored predetermined date-and-time were not explicitly taught by Alve et al., however, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate these features in the Alve et al. system since it would have provided greater control of authorizations and thus greater efficiency, and one of ordinary skill in the art at the time the invention was made would have recognized that this could have occurred in the Alve et al. system whenever an authorization period came to an end – for example, at the end of a yearly subscription the predetermined number would be set to zero.

Allowable Subject Matter

11. Claims 3 and 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. All of the claims in this application would be allowable if amended to include:
- (A) the language of claim 3, lines 6-8, in each independent claim;
 - (B) a correction and/or explanation of "part of the right to duplicate" in claims 15 and 17;
 - (C) the suggested language provided in Section 6 above, to make claim 20 statutory.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
